

UX-TOUCH01

7" Wi-Fi Touchscreen compatible with ZeroWire & xGen

Overview

The 7" TouchScreen provides a new way to interact with ZeroWire or xGen control panels. Accommodating up to four 7" TouchScreens per system, System owners can control their system from multiple locations throughout their property.

Communication

The 7" Touchscreen connects to ZeroWire or xGen control panels wirelessly via Wi-Fi® and features an icon-operated interface that's nearly identical to the UltraSync mobile app. The common interface between the 7" Touchscreen and the mobile app helps to reduce operator learning time and improve the overall user experience.

At a glance visibility

The 7" Touchscreen provides at-a-glance visibility to system status and easy operation through an icon-rich interface. It also provides audible signals to indicate when the system is in an arming/disarming sequence and will siren when the system is in alarm.

Standard Features

- Up to four 7" TouchScreens supported on a single ZeroWire/ xGen panel
- Connectivity via a wireless Wi-Fi router
- Micro-USB power supply
- Tabletop or wall-mount placement
- Controls for individual as well as all areas/partitions of a ZeroWire/ xGen system: arming/disarming, automations, lighting control, door lock control, thermostat control, live video and recorded clips, systems settings and programming.

UX-TOUCH01

7" Wi-Fi Touchscreen compatible with ZeroWire & xGen

Specifications
